

Capability Overview Presentation  
Feb 2016

We just do common things Uncommonly Well

# One of the largest hedge fund in US

## Technology Migration

### Client situation

The database on which majority of client's processes were running on an old system which was causing critical business reports to be delayed.

### Key services offered

- Pre-Migration Testing
- Re-engineering & application code changes
- Execution & Deployment plan
- Post-Migration Support

### Scope of work included

- Pre-Migration Testing:
  - Setup of a standalone regression environment to conduct thorough testing
  - Daily integrated cycle testing for system performance analysis
  - Impact analysis reports to capture potential impact on end-data
- Re-engineering efforts:
  - Working with different DEV teams to re-design code to make it compatible & testing of the same
- Execution & Deployment Plan:
  - Preparation of detailed deployment plan & multiple dress rehearsals to practice “go-live” drill
  - Identification of major checkpoints for data validation & sanity checks
- Post Migration Support:
  - Intensive, alert, continuous system & application monitoring
  - Optimization of existing processes & applications to leverage perks of upgraded system

### Value delivered:

Upgraded to a better & faster system, enabling the client to meet current & future business needs more effectively
